HEALTH PROFILES FOR PENNSYLVANIA COUNTIES

Pennsylvania

1984
State Health Data Center

Dick Thornburgh, *Governor, Commonwealth of Pennsylvania*
H. Arnold Muller, M.D., *Secretary of Health*

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

POPULATION CHARACTERISTICS

1. DEMOGRAPHIC DATA

Total Land Area	44,966	Per Capita Personal Income (1981)	$10,366
Estimated Population (1982)	11,885,330	% of Population Receiving Cash Assistance (1983)	6.0
Population per Square Mile (1982)	264	% of Labor Force Unemployed-Annual Average (1982)	10.9
% Population Change 1980 to 1982	+0.2	% of Pop. Eligible for Medical Assistance (1983)	9.8

Estimated Population by Age and Sex (1982)

	All Ages	0-4	5-14	15-24	25-34	35-44	45-54	55-64	65+
Male	5,699,248	386,192	869,069	1,026,541	920,653	667,813	586,320	615,430	627,230
Female	6,186,082	368,904	828,250	1,025,548	932,518	708,207	643,990	715,725	962,940
Total	11,885,330	755,096	1,697,319	2,052,089	1,853,171	1,376,020	1,230,310	1,331,155	1,590,170

2. MARRIAGES (1982)

Number of Marriages	93,350
Rate per 1,000 Population	7.9

3. BIRTHS AND INFANT DEATHS (1982)

Number of Births	161,561	Number of Infant Deaths	1,853
Rate per 1,000 Population	13.6	Rate per 1,000 Live Births	11.5

4. MORTALITY (1982)

Number of Deaths	118,450
Crude Rate per 1,000 Population	10.0

Leading Causes of Death by Age Group (1982)

All Ages			Under 5 Years of Age			5-24 Years of Age		
Cause	Number	% Of Total	Cause	Number	% Of Total	Cause	Number	% Of Total
Heart Disease	46,470	40.9	Perinatal Conditions	1,005	47.1	Accidents, All Forms	1,040	49.1
Cancer	26,483	22.4	Congenital Anomalies	417	19.5	Suicide	238	11.2

POPULATION CHARACTERISTICS (Continued)

5. MORBIDITY (Provisional 1983)

Incidence of Notifiable Diseases

Gonorrhea		29,245	Meningitis:	Aseptic	421	Salmonellosis	1,929
Hepatitis:	Type A	974	Meningitis:	Meningococcal	167	Shigellosis	604
Hepatitis:	Type B	1,213	Mumps		85	Syphilis	569
Hepatitis:	Unspecified	186	Rubella		26	Tuberculosis	984

HEALTH SERVICES AND FACILITIES

1. HOSPITALS (1982)

Number of Hospitals by Type

Total	General Acute Care	Psychiatric	Rehabilitation	Federal	Other
297	226	29	12	10	20

Number of General Hospitals with the Following Ambulatory Care Services/Facilities:

Community Mental Health Center	33	Emergency Services Capability:	
Home Health Service	53	Limited	1
Structured Clinics	137	Basic	16
Family Practice Center	62	General	147
		Comprehensive	59

Number of General/Specialty Hospitals with Neonatal Units:

Well Infant Nursery	Neonatal Intermediate Care Unit	Neonatal Intensive Care Unit
179	32	23

General Hospitals			
Number of Beds Set Up & Staffed	54,616	Number per 1,000 Population	4.6
Number of Admissions	1,839,994*	Number per 1,000 Population	154.8***
Specialty and Federal Hospitals			
Number of Beds Set Up & Staffed	20,751	Number per 1,000 Population	1.7
Number of Admissions	157,083**	Number per 1,000 Population	13.2****

Average General Hospital Semi-Private Daily Room Rate $183

* Five hospitals did not report these data.
** One hospital did not report these data.
*** Five hospitals did not report data necessary for this computation.
****One hospital did not report data necessary for this computation.

2. LONG TERM CARE FACILITIES (1983)

Licensed/Approved Facilities by Level of Care and Certification

Type of Facility	Total	Certified-Medicare	Certified-Medicaid
Skilled Nursing Facility (SNF)	310	209	258
Intermediate Care Facility (ICF)	49	0	43
SNF/ICF Combined Facility	283	233	270
TOTAL	642	442	571

Number of Licensed/Approved Beds			
Skilled	50,392	Number per 1,000 Population Aged 65 and Over	31.7
Intermediate	29,859	Number per 1,000 Population Aged 65 and Over	18.8
Total (SNF + ICF)	80,251	Number per 1,000 Population Aged 65 and Over	50.5

1981 Median Semi-Private Daily Room Rate
Skilled $47
Intermediate $42

HEALTH SERVICES AND FACILITIES (Continued)

3. OTHER HEALTH SERVICES/FACILITIES

a. Drug and Alcohol Treatment (1983)

Utilization of State Supported Drug and Alcohol Treatment Facilities				
Number of Facilities	Admissions	Percent First Admissions	Discharges	Estimated Daily Caseload
392	62,727	46%	60,520	13,325

Number of State Supported Drug and Alcohol Treatment Facilities Providing Specified Services					
Inpatient Non-Hospital	Inpatient Hospital	Correctional Institution	Partial Hospitalization	Outpatient	Shelter
92	41	3	9	219	28

b. Emergency Health Services (1983)

Certified Emergency Medical Technicians	34,278	Certified Paramedics I	1,834
Ambulance Providers	1,180	Certified Paramedics II	1,534

c. Agencies/Facilities for the Developmentally Disabled (1983)

Total Number of Agencies/Facilities 500

Number Serving the Following Disabilities:

Mental Retardation	432	Autism	343	Muscular Dystrophy	344
Cerebral Palsy	395	Learning Disabilities	385	Other	408
Epilepsy	386	Multiple Sclerosis	327		

d. Primary Health Care Centers (1983)

Number of Agencies 108

e. Licensed Boarding Homes (1983)

Number of Homes 869

LICENSED HEALTH PERSONNEL/SHORTAGE AREAS

1. ACTIVE LICENSED PHYSICIANS: (1981)

	Number of Medical Doctors*	Number of Osteopathic Physicians*
Total Physicians	13,333	1,329
Primary Care Physicians	5,245	892
General Practice	824	447
Family Practice	1,313	298
Internal Medicine	1,589	80
Obstetrics/Gynecology	689	39
Gynecology Only	94	3
Pediatrics	736	25

2. ACTIVE LICENSED REGISTERED NURSES* BY AREA OF NURSING (1981)

Total Registered Nurses	75,973	Emergency Medicine	3,555	Psychiatric	4,558
Medical/Surgical	31,671	Community Health	4,749	Administrative	1,989
ICU/CCU	8,916	Pediatrics	3,980	General Practice	5,475
Geriatrics	7,643	Education	1,488	Other	2,049

* Health personnel data based on surveys conducted by the State Health Data Center in 1981. State response rates for these surveys: Physicians (M.D.) 73%, Physicians (D.O.) 67%, RN's 94%.

3. HEALTH PERSONNEL SHORTAGE AREAS

Primary Care Physicians (1984): Not Applicable

Dental Care (1982): Not Applicable

Psychiatric Care (1983): Not Applicable

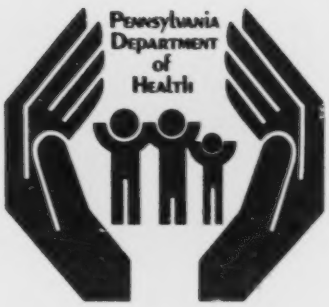
HEALTH PROFILES FOR PENNSYLVANIA COUNTIES



Allegheny

1984
State Health Data Center

Dick Thornburgh, *Governor, Commonwealth of Pennsylvania*
H. Arnold Muller, M.D., *Secretary of Health*

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

HEALTH PROFILES FOR PENNSYLVANIA COUNTIES

Armstrong

1984
State Health Data Center

Dick Thornburgh, *Governor, Commonwealth of Pennsylvania*
H. Arnold Muller, M.D., *Secretary of Health*

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

POPULATION CHARACTERISTICS

1. DEMOGRAPHIC DATA

HEALTH PROFILES FOR PENNSYLVANIA COUNTIES

Berks

1984
State Health Data Center

Dick Thornburgh, *Governor, Commonwealth of Pennsylvania*
H. Arnold Muller, M.D., *Secretary of Health*

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

HEALTH PROFILES FOR PENNSYLVANIA COUNTIES

Bradford

1984
State Health Data Center

Dick Thornburgh, *Governor, Commonwealth of Pennsylvania*
H. Arnold Muller, M.D., *Secretary of Health*

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

HEALTH PROFILES FOR PENNSYLVANIA COUNTIES

Cambria

1984
State Health Data Center

Dick Thornburgh, *Governor, Commonwealth of Pennsylvania*
H. Arnold Muller, M.D., *Secretary of Health*

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

POPULATION CHARACTERISTICS

1. DEMOGRAPHIC DATA

HEALTH PROFILES FOR PENNSYLVANIA COUNTIES

Centre

1984
State Health Data Center

Dick Thornburgh, *Governor, Commonwealth of Pennsylvania*
H. Arnold Muller, M.D., *Secretary of Health*

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

POPULATION CHARACTERISTICS

1. DEMOGRAPHIC DATA

HEALTH PROFILES FOR PENNSYLVANIA COUNTIES

Clearfield

1984
State Health Data Center

Dick Thornburgh, *Governor, Commonwealth of Pennsylvania*
H. Arnold Muller, M.D., *Secretary of Health*

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

HEALTH PROFILES FOR PENNSYLVANIA COUNTIES

Columbia

1984
State Health Data Center

Dick Thornburgh, *Governor, Commonwealth of Pennsylvania*
H. Arnold Muller, M.D., *Secretary of Health*

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

POPULATION CHARACTERISTICS

HEALTH PROFILES FOR PENNSYLVANIA COUNTIES

Dauphin

1984
State Health Data Center

Dick Thornburgh, *Governor, Commonwealth of Pennsylvania*
H. Arnold Muller, M.D., *Secretary of Health*

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

HEALTH PROFILES FOR PENNSYLVANIA COUNTIES

Erie

1984
State Health Data Center

Dick Thornburgh, *Governor, Commonwealth of Pennsylvania*
H. Arnold Muller, M.D., *Secretary of Health*

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

Dick Thornburgh, *Governor, Commonwealth of Pennsylvania*
H. Arnold Muller, M.D., *Secretary of Health*

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

POPULATION CHARACTERISTICS

1. DEMOGRAPHIC DATA

Total Land Area	578	Per Capita Personal Income (1981)	$7,662
Estimated Population (1982)	40,843	% of Population Receiving Cash Assistance (1983)	9.1

HEALTH PROFILES FOR PENNSYLVANIA COUNTIES

Jefferson

1984
State Health Data Center

Dick Thornburgh, *Governor, Commonwealth of Pennsylvania*
H. Arnold Muller, M.D., *Secretary of Health*

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

POPULATION CHARACTERISTICS

1. DEMOGRAPHIC DATA

HEALTH PROFILES FOR PENNSYLVANIA COUNTIES

Lancaster

1984
State Health Data Center

Dick Thornburgh, *Governor, Commonwealth of Pennsylvania*
H. Arnold Muller, M.D., *Secretary of Health*

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

POPULATION CHARACTERISTICS

1. DEMOGRAPHIC DATA

HEALTH PROFILES FOR PENNSYLVANIA COUNTIES

Lehigh

1984
State Health Data Center

Dick Thornburgh, *Governor, Commonwealth of Pennsylvania*
H. Arnold Muller, M.D., *Secretary of Health*

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

HEALTH PROFILES FOR PENNSYLVANIA COUNTIES

Lycoming

1984
State Health Data Center

Dick Thornburgh, *Governor, Commonwealth of Pennsylvania*
H. Arnold Muller, M.D., *Secretary of Health*

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

POPULATION CHARACTERISTICS

1. DEMOGRAPHIC DATA

Total Land Area	1,215	Per Capita Personal Income (1981)	$8,949

HEALTH PROFILES FOR PENNSYLVANIA COUNTIES

Mifflin

1984
State Health Data Center

Dick Thornburgh, *Governor, Commonwealth of Pennsylvania*
H. Arnold Muller, M.D., *Secretary of Health*

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

HEALTH PROFILES FOR PENNSYLVANIA COUNTIES

Montour

1984
State Health Data Center

Dick Thornburgh, *Governor, Commonwealth of Pennsylvania*
H. Arnold Muller, M.D., *Secretary of Health*

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

HEALTH PROFILES FOR PENNSYLVANIA COUNTIES

Perry

1984
State Health Data Center

Dick Thornburgh, *Governor, Commonwealth of Pennsylvania*
H. Arnold Muller, M.D., *Secretary of Health*

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

POPULATION CHARACTERISTICS

HEALTH PROFILES FOR PENNSYLVANIA COUNTIES

Pike

1984
State Health Data Center

Dick Thornburgh, *Governor, Commonwealth of Pennsylvania*
H. Arnold Muller, M.D., *Secretary of Health*

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

POPULATION CHARACTERISTICS

1. DEMOGRAPHIC DATA

Total Land Area	542	Per Capita Personal Income (1981)	$7,351
Estimated Population (1982)	19,550	% of Population Receiving Cash Assistance (1983)	1.2
Population per Square Mile (1982)	36	% of Labor Force Unemployed-Annual Average (1982)	8.6

HEALTH PROFILES FOR PENNSYLVANIA COUNTIES

Snyder

1984
State Health Data Center

Dick Thornburgh, *Governor, Commonwealth of Pennsylvania*
H. Arnold Muller, M.D., *Secretary of Health*

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

HEALTH PROFILES FOR PENNSYLVANIA COUNTIES

Susquehanna

1984
State Health Data Center

Dick Thornburgh, *Governor, Commonwealth of Pennsylvania*
H. Arnold Muller, M.D., *Secretary of Health*

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

HEALTH PROFILES FOR PENNSYLVANIA COUNTIES

Venango

1984
State Health Data Center

Dick Thornburgh, *Governor, Commonwealth of Pennsylvania*
H. Arnold Muller, M.D., *Secretary of Health*

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

HEALTH PROFILES FOR PENNSYLVANIA COUNTIES

Wayne

1984
State Health Data Center

Dick Thornburgh, *Governor, Commonwealth of Pennsylvania*
H. Arnold Muller, M.D., *Secretary of Health*

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

HEALTH PROFILES FOR PENNSYLVANIA COUNTIES

Wyoming

1984
State Health Data Center

Dick Thornburgh, *Governor, Commonwealth of Pennsylvania*
H. Arnold Muller, M.D., *Secretary of Health*

The Pennsylvania Department of Health has a legislative mandate to "protect the health of the people of the Commonwealth and to determine the most efficient and practical means for the prevention and suppression of disease." In order to advance toward these goals, we need statistical information on the health status of the population, the health care delivery system, and demographic and population characteristics.

The first health profiles were published in 1977 to provide a compendium of health data. These profiles have been updated and revised biennially, starting in 1978, to better meet the needs of governmental leaders, health program specialists, state and local planners, and concerned citizens.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles - one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. 1982 estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates except for hospital and long term care facilities data where provisional estimates were used.

The major data source is the State Health Data Center, Pennsylvania Department of Health - specifically the vital records component of the Cooperative Health Statistics System, the Annual Hospital and Long Term Care Questionnaires, the Health Personnel Surveys, the Uniform Data Collection System for drug and alcohol information and the Developmental Disabilities Facility Questionnaire as funded by the Developmental Disabilities Planning Council. Additional sources include other units of the Department, (i.e. the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, and Professional Health Services), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, and Pennsylvania Office of Employment Security.

The profiles will continue to be updated biennially, with the next edition available in 1986. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548.

POPULATION CHARACTERISTICS

1. DEMOGRAPHIC DATA

Total Land Area	398	Per Capita Personal Income (1981)	$7,196
Estimated Population (1982)	26,741	% of Population Receiving Cash Assistance (1983)	5.7
Population per Square Mile (1982)	67	% of Labor Force Unemployed-Annual Average (1982)	12.1
% Population Change 1980 to 1982	+1.2	% of Pop. Eligible for Medical Assistance (1983)	11.6
